EXPERIENCE

Ovabor Labs, Remote — AI Agents Developer

Jan. 2025 - Present

Architected and developed intelligent AI agents using the Mastra framework, implementing sophisticated agentic workflows that automated business processes.

Integrated and optimized third-party tools through the Arcade platform, creating seamless connections between AI agents and external APIs, resulting in enhanced functionality and reduced manual intervention.

Designed and implemented multi-agent systems with advanced decision-making capabilities, enabling autonomous task execution and intelligent resource allocation across distributed environments.

Enoverlabs, Lagos — Frontend Developer

Aug. 2023 - Nov. 2023

Led a high-performing frontend engineering team, implementing and establishing coding standards that increased team productivity and reduced project delivery time.

Architected and maintained scalable codebases through strategic refactoring and optimization initiatives, achieving performance improvement and reducing technical debt by implementing modern development practices.

Partnered closely with design teams to translate wireframes and mockups into pixel-perfect, interactive user interfaces, increasing user satisfaction scores and enhancing visual appeal.

Conceptualized and implemented innovative features, including dynamic user interfaces that differentiated the product.

Uptick Talent, Jos — Frontend Developer

Sep. 2023 - Dec. 2023

Translated complex UI/UX designs and business requirements into robust, scalable code solutions, ensuring seamless alignment between vision and technical implementation.

SKILLS

HTML

CSS

JavaScript

React.js

Next.js

Node.js

MongoDB

Mastra AI

Git

GitHub

Tailwind CSS

LANGUAGE

English

Enhanced user engagement and application performance by implementing strategic design improvements that optimized loading times and increased user retention through intuitive interface design.

Developed cross-platform applications utilizing React.js, Next.js, TypeScript, and JavaScript, delivering consistent user experiences across mobile and desktop environments with responsive design principles.

Collaborated extensively with cross-functional teams, including designers, product managers, and QA engineers, to validate design concepts, ensure adherence to UI/UX best practices, and maintain design system consistency.

EDUCATION

Lagos State University, Lagos, Nigeria — *Diploma in Business Administration*

March 2019 - April 2022

Graduated with exceptional academic distinction, achieving a cumulative GPA of 4.6.

Served as Principal Researcher and Team Lead for a comprehensive research project titled "The Impact of External Environment on Small Scale Business Performance in Lagos State," directing a multidisciplinary research team and conducting in-depth analysis of economic factors affecting SME sustainability in Nigeria's commercial hub.

AltSchool Africa, Lagos, Nigeria — *Diploma in Software Engineering (Backend Development)*

September 2023 - August 2024

Developed and deployed "Eventful" full-stack application as capstone project, creating a comprehensive event management platform that streamlines ticketing and experience curation across diverse entertainment sectors, including concerts, theater, sports, and cultural events. Engineered using Node.js and MongoDB with robust security protocols, implementing OAuth authentication, role-based access control, and optimized database queries to support concurrent user sessions and real-time event management capabilities.

ADDITIONAL ACHIEVEMENTS & PROFESSIONAL DEVELOPMENT

Secured 2nd place in frontend development competition (32 participants) - Dominion Computer College

Actively maintain a portfolio of personal projects and open-source contributions across collaborative development initiatives.

Received Certificate of Appreciation for teaching web development at a local NGO
